

Arranging a perfect room for our youngest family member is an important and fascinating task. When focusing on colourful blankets, soft carpets and stimulating toys, do not forget about the most important element that determines the quality of sleep.

On our website you will find high-quality **mattresses for children and babies - latex and foam**. Buying the right mattress should be considered carefully - how your baby sleeps will have a huge impact on his health.

# OUR MISSION & CORE VALUES

HIGH QUALITY  
AT FAIR PRICE

Our mission is to create **intelligently designed, natural products at good prices**: highly comfortable and healthy & thanks to the properties of latex, medical and orthopaedic.

Our **mattresses** are of **high quality, consistent and sustainable**, created for all: available to everyone and everyone can afford them.

**Our mattresses are manufactured on-site** in Poland using the highest quality materials and raw materials from the EU, Tested and certified for children and adults.

*The brand and MaybeBaby.eu store was established in 2013. It was founded by young parents who, while paving the way for shopping - from planning a child to its birth and early upbringing - chose carefully selected products, offering them to future parents - for their children.*

*At that time, we were offering a very broad range of layette items - from great literature for future parents, through layette for a child and mother to take to the hospital, room equipment, prams and car seats as well as first toys or books.*

*In 2015-2017, we narrowed down the store's assortment by focusing on the key important elements of each layette for a newborn, which is the equipment of the baby's bedroom. Hence, cots and children's beds, mattresses, mattress protectors, blankets and covers, bedding and products made of broadly understood bed linen.*

*In 2019, in response to the needs of our customers, we offer a collection of mattresses for adults and children - the youngest - newborns and older adolescents.*

# MATTRESSES FOR BABIES & KIDS: TO GUARANTEE THE HEALTHY SLEEP FOR YOUR CHILD

HEALTHY SLEEP

The little ones sleep much more often than adults, so it is worth making sure they rest comfortably.

In the interests of your child's individual needs, we offer models recommended by **paediatricians** and **physiotherapists**, which guarantee healthy sleep, while demonstrating **anti-allergic properties**.

Additionally, in this category, you will find practical accessories - a comfortable topper and a waterproof bumper, perfect for a small cot bed.

## LATEX BABY CLASSIC

Our mattress is specifically designed for babies and children, to guarantee the appropriate firmness. To ensure your child a peaceful and natural sleep, offer him the **Latex Baby Classic Mattress**. Thanks to the elasticity of the latex insert and its orthopaedic properties, it provides ideal and proper support along the entire length of your baby's body, regardless of the position your child takes during sleep. The Latex Baby Classic is perfect as the first mattress for your baby - from the birth of babies up to a maximum weight of 40 kg (88 pounds)

Our mattress is **extremely hygienic, breathable and provides 100% natural anti-allergic protection** against bacteria and dust mites.

Our high-quality children's mattress is made of a **uniform (non-glued) certified 100% latex block**. And it's **reversible** - with two identical sides, both delivering the best quality sleep for your baby.

Latex is literally the best material a mattress can be made of. Especially in early childhood, when you choose a latex mattress, you can be sure to protect your child from possible spinal distortions. Latex **perfectly follows the shape of the body, the spine and the position of the child, reducing pressure and providing the perfect support for your little one.**

The Latex baby Classic mattress has the highest degree of flexibility of any mattress material.

The latex has been for years **recommended by physiotherapists, orthopedists, paediatricians and neonatologists** as the best material for a mattress.

**Mattress filling: 100% latex, OEKO-TEX® certified: Standard 100**, made of a solid latex block, with vertical air channels

# LATEX BABY CLASSIC

HEALTHY SLEEP

- Perfect for children with allergies: latex is naturally free from dust mites, fungi, mold and bacteria
- Breathable thanks to the combination of extremely hygienic latex and vertical ventilation channels
- Highly orthopaedic product; ideal for rehabilitation and to prevent bedsores
- High sleeping comfort: latex adapts to the shape of the body, providing stable support for the spine
- Mattress Cover with a zipper, easily removable for washing
- Double-sided and reversible, with identical sleep surface on both sides
- 10-year warranty
- Made in Poland by the Polish manufacturer - all components used for production are certified by OEKO-TEX®: Standard 100, and come from the EU
- The mattress hardness: H2 - Medium - hard (for children weighing up to 40 kg).
- Maximum sleeper weight: 40 kg (88 pounds)
- Mattress height 9 cm: Latex 7 cm + Cover 2 cm.

**High elasticity, flexibility and orthopaedic properties of latex** provide the best, even and proper support along the entire length of your child's spine. Regardless of the position, your baby sleep in - on the side, on the back or on the stomach - our mattress supports every part of the body, ensuring the highest comfort and quality of rest.

## **Latex - the king of Orthopedic mattresses**

Thanks to its properties, a latex mattress is successfully used as a preventive measure in orthopaedics, and its beneficial effects ensure a healthy and comfortable sleep.

Latex is used to support the rehabilitation process in people with postural defects, as well as a tool in defects prevention in the musculoskeletal system.

**Hypoallergenic and antibacterial** - the mattress is perfect for children suffering from allergies and asthma. Due to **anti-allergic and anti-fungal properties**, latex mattresses are recommended for allergy sufferers. Bacteria, fungi and molds do not develop inside latex! Only safe and certified materials that do not contain allergens are used for the production of our mattress.

**The best breathable mattress:** The ventilation holes inside the mattress allow great airflow and perfect circulation. They also remove moisture. The system prevents sweating of the sleeper thus ensuring proper hygienic sleep conditions.

**Easy cover removal for washing:** The cover is easily removed (thanks to a zipper on 3 sides) to be washed at a temperature of up to 60 degrees Celsius.

**Anti-allergic mattress cover:** We offer mattress cover of the highest quality; made in Poland, only of certified Polish fabric, zipped on 3 sides, quilted with fluffy non-woven fabric, which gives extraordinary softness. Perfect to withstand multiple washes. **Our Covers are made of fabrics certified by ÖKO-TEX® and Safe for Children.**

The cover has antiallergic properties, is extremely hygienic and durable. Quilted with a non-woven fabric with a weight of 200 grams / m<sup>2</sup>, which makes it fluffy and delicate.

# 14 REASONS WHY... TO CHOOSE A LATEX MATTRESS OR TOPPER

HEALTHY SLEEP

**1. Increased comfort.** A latex mattress topper delivers ultimate comfort. When guests first lie down on a latex topper, they'll at first feel a soft sinking feeling, followed immediately by a buoyant supportive sensation. This is due to the natural springiness of latex, and it feels incredibly comfortable.

**2. Promotes pain relief.** Latex mattresses are an ideal choice for those with back pain or joint pain. Many health professionals (osteopaths, physical therapists and chiropractors) recommend latex mattresses for pain relief. This is because of the comfort and cushioning properties of the latex, as well as its ability to promote natural spine alignment. In any case, if the pain is interfering with sleep, a switch to a latex mattress could help significantly.

**3. Natural spine alignment.** A huge advantage of latex mattresses is their ability to promote proper spine alignment. Heavier parts of the (shoulders and hips) sink into the latex, yet lighter areas are still strongly supported to align the spine naturally. The ability to support the natural curvature of the spine is a huge bonus for health and wellness, as well as keeping pain at bay. Furthermore, with this good pressure distribution, blood circulation is improved on a latex mattress.

**4. All-natural.** Latex is a natural product, produced from the sap of the rubber tree, *Hevea brasiliensis*. The milky-white sap is processed into a comfortable foam mattress block. The springiness your guests feel when they lie down is entirely due to the natural properties of the latex. Because of its all-natural origin, there is no need to worry about toxic chemicals or metals being present in a latex mattress, unlike other mattresses. All mattresses we offer are Oeko-Tex 100 standard-certified to ensure that harmful toxins are not found in the end product.

**5. Fire resistant.** Latex is naturally fire resistant. Other types of mattresses have many different chemicals added to them during manufacturing to increase their resistance to fire. Many of these chemicals are associated with adverse health effects including cancer, immunotoxicity and reproductive toxicity. The natural resistance to fire latex exhibits allows manufacturers to use far fewer, or no toxic flame retardants.

# 14 REASONS WHY... TO CHOOSE A LATEX MATTRESS OR TOPPER

HEALTHY SLEEP

**6. Natural resistance to mould and dust mites.** Latex is naturally mould resistant and dust mite resistant without the use of any added chemicals. Other types of mattresses are either not resistant at all - resulting in big problems such as visible mould growth - or they are resistant but only because harsh chemicals have been added. Hence, latex is the ideal choice for a naturally hygienic and healthy sleeping environment.

**7. Naturally allergen free.** The vast majority of allergies in the bedroom are actually caused by the body's reaction to proteins produced by dust mites or mould. Latex mattresses are naturally resistant to mould and dust mites, so they simply do not contain these allergens. Therefore, those who suffer from year-round allergies may find relief with a latex mattress.

**8. Environmentally responsible.** When you purchase a 100% pure latex mattress, you are supporting the growth of the rubber tree. Tapping the rubber tree to collect the latex-containing sap will not kill the tree. Therefore, the production of latex mattresses encourages the growth of rubber trees. Plantations are carefully managed to ensure their growth is sustainable. The trees in these plantations remove carbon dioxide from the air, so you are helping the environment when you purchase a latex mattress. There is simply no other type of mattress which is as environmentally responsible. All other types of mattresses require a lot of synthetic ingredients and harm the environment instead of helping it. For those who want the ultimate in environmental friendliness, organic latex mattresses are available. This is becoming increasingly popular, especially among eco-conscious shoppers and parents of babies and young children.

**9. No metal,** therefore no amplification of electromagnetic radiation. The zero-metal content of latex mattresses make them very popular among those who want to sleep safely. In contrast, the metal springs in spring coil mattresses are believed to amplify electromagnetic radiation, acting like an antenna: this is not a good environment for our bodies to sleep on.

# 14 REASONS WHY... TO CHOOSE A LATEX MATTRESS TOPPER

HEALTHY SLEEP

**10. Excellent air circulation.** Latex has a natural open-cell structure, allowing for good air flow. In addition, a series of pinholes are added during the processing of latex, and this increases airflow even further. This excellent air circulation makes for a cooler night's sleep. In addition to comfort, hygiene is another benefit of the superb air circulation of latex mattresses. Perspiration does not linger or make a latex mattress feel damp.

**11. Motion isolation.** Motion isolation means that when one partner rolls over or tosses and turns, movement on the other side of the bed is barely noticeable. This makes for a much more pleasant sleeping experience with fewer disturbances. This is a big advantage compared to spring mattresses which tend to transfer motion from side to side.

**12. Longevity.** Latex mattresses and toppers are among the most durable types of mattresses. They last a lot longer than other types of mattresses before needing to be replaced. This high durability is one of the many reasons for the high level of owner satisfaction with latex mattresses. All-latex mattresses tend to outlast other types by anywhere from 2 to 7 years, on average providing comfort for 10-12 years. Though very durable, latex is also biodegradable.

**13. Customizability.** Another reason to choose latex over other types of mattresses is the ease of customization. We can often customize your bed from top to bottom to achieve a specific feel, or even create a bed with two different firmness levels on each side. Models with unglued layers also offer consumers the ability to replace upper layers when worn to further extend mattress life.

14. No smell. Limited to no off-gassing is a key benefit for people sensitive to smells. This is a main difference between the different types of latex, primarily linked with all-natural latex mattresses.

**14. No smell.** Limited to no off-gassing is a key benefit for people sensitive to smells. This is a main difference between the different types of latex, primarily linked with all-natural latex mattresses.
